## EXPERIENCE

### **Stableflow, Ukraine — *React developer***

06/2020 - PRESENT

- Led the design and implementation of the front-end architecture using React.
- Implemented a Single Page Application (SPA) using ReactJS and Redux for the user interface, while employing React Router to enhance SPA functionality.
- Integrated Stripe for seamless payment processing.
- Collaborated effectively to expand and optimize existing products, utilizing my expertise to introduce new functionalities and enhance the performance of UI components developed in React.

### **CodeIT LLC, Ukraine — *Angular developer***

12/2015 - 11/2018

- Developed and maintained the billing system using Angular and TypeScript, ensuring efficient payment processing through Stripe integration.
- Utilized Angular and TypeScript for frontend development and NgXS for effective state management.
- Collaborated with cross-functional teams, including designers, product managers, and quality assurance engineers, to ensure the timely delivery of high-quality software.

### **Upwork, outsource — *Self-employed***

12/2012 - 12/2015

Worked with several international agencies, including Carlo Roosen IT Inventions, Buscokite, WeSolveTechnologies, and Sotiri, to develop dozens of custom design, HTML, and WordPress solutions for their clients.

Worked as a freelancer on the Upwork platform, specializing in front-end development for web and mobile applications.

- Completed over 100 projects, including websites and mobile applications, with full development lifecycle from conception to deployment.
- Accumulated over 1,300 paid hours with positive feedback from clients.
- Effectively utilized skills in HTML5, CSS, and JavaScript to create dynamic and user-friendly interfaces.
- Experienced in working with the WordPress CMS for creating and customizing user websites.
- Proficient in graphic design tools such as Adobe Illustrator, Photoshop, and Figma for UI design and prototyping.
- Possess strong communication skills and interact with clients to understand

## SKILLS

React, Redux, Next.js  
Angular, Socket.io  
JavaScript, TypeScript, jQuery  
RestAPI, StripeApi  
Vite, Gulp/Webpack, Jira, Git  
HTML, CSS, Grid, Flex, SCSS,  
Bootstrap  
GA4, GTag, Facebook Conversion  
API,

Zeplin, AI, Figma, Sketch  
Agile, Scrum

## LANGUAGES

English, Ukrainian, Russian

their requirements and ensure satisfaction with their needs.

## EDUCATION

**National Technical University «Kharkiv Polytechnic Institute»,**  
Ukraine — *Bachelor degree in computer science*

09/2004 - 05/2008

## RECENT PROJECTS

**SeparateSpace** — <https://www.separatespace.co.uk/>

**Timeline:** 2022- recent

**Stack:** React, Redux, JavaScript, HTML, CSS, Stripe API, Canva, Figma

**Description:** SeparateSpace is a comprehensive platform designed to assist individuals through the process of divorce by offering personalized support and resources. The platform features user registration, subscription plans with Stripe integration, personalized dashboards, and a ticketing system to guide users through various milestones.

### Key Responsibilities:

- **User Registration & Subscription Plans:**
  - Implemented user registration flows, ensuring secure authentication and authorization.
  - Integrated Stripe for handling subscription payments, allowing users to access premium content upon successful payment.
- **Personalized Dashboard:**
  - Developed dynamic user dashboards that display personalized content, milestones, and resources based on user inputs.
  - Created a questionnaire module that tailors user experience by generating specific advice, guides, and case studies.
- **Ticketing System:**
  - Implemented a ticket system where users can track their progress through various milestones.
  - Developed admin features to manage tickets, including creating, editing, and assigning templates.

**VSOA Police** — [SLFP Police](#)

**Role:** UI/UX Designer

**Tools:** Sketch, Figma

**Description:** SLFP Police is a mobile application designed to provide police officers with streamlined access to essential tools and information, enhancing their efficiency and effectiveness in the field. The app includes features such as incident reporting, real-time communication, and access to critical data.

**Key Responsibilities:**

- Created detailed wireframes and interactive prototypes using tools such as Figma and Sketch.
- Designed an intuitive and user-friendly interface, prioritizing ease of use and quick access to critical functions.
- Developed a consistent visual design language, incorporating typography, color schemes, and iconography that aligns with the brand's identity and enhances user experience.

**Resource Planning & CPQ System For Professional Services**

**Stack:** Angular, Socket.io, js, SCSS, HTML

**Description:** The resource planning & CPQ system for professional services is an innovative solution that helps businesses automate more than 90% of the paperwork burden.

The system can fetch data from connected sales software like customer relationship management (CRM) or professional services automation (PSA) software.

It can analyze all the data and update sales pipelines simultaneously to receive accurate forecasts. Hence, businesses always have access to data-backed reports on resources spent and expected revenues.

**CERTIFICATIONS****Redux for state management in React applications**

<https://www.udemy.com/certificate/UC-0e23e240-db31-4342-a6e4-9ffb423f8674/>

**A complete course on modern Frontend with React and Next.js 13. Everything from CSS Grid and TypeScript to React Hooks and SSR.**
